Network Management Operations (nmop) WG – Session 1

IETF 127, November 18th, 2026

WG Chairs: B. Claise, R. Rahman

This session is being recorded

Note Well

By participating in the IETF you agree to follow IETF processes and policies. This Note Well is a reminder of some of those policies. For a linked version of this text, please visit *www.ietf.org/note-well* or use the QR code below.

- IETF participants are expected to behave in a professional manner and extend respect and courtesy to their colleagues at all times (see *RFC 7154: IETF Guidelines for Conduct and IETF Anti-Harassment Policy*). If you have any concerns about behavior, please contact the *Ombudsteam* who have a duty of confidentiality and extensive powers to act, as set out in *RFC 7776: IETF Anti-Harassment Procedures*.
- If you are aware that any IETF contribution (as defined in *RFC 5378: Rights Contributors Provide to the IETF Trust*) is covered by patents or patent applications that are owned or controlled by you, your employer or your sponsor, you must disclose that fact, or not participate in the discussion (see *RFC 8179: Intellectual Property Rights in IETF Technology*).
- For detailed process information consult *RFC 2026: Internet Standards Process* and *RFC 2418: IETF Working Group Guidelines and Procedures* and updates to those.
- The IETF routinely makes public written, audio, video, and photographic records of IETF activities, including your personal information as set out in the *IETF Privacy Statement*.

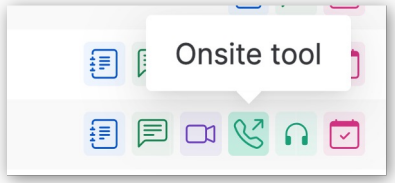

For advice, please talk to Working Group chairs or Area Directors.

This session is being recorded

IETF 127 Meeting Tips

In-person participants

- Make sure to sign into the session via Datatracker or the QR Code in this session.
- Use Meetecho (usually the “Meetecho lite”) client to:
  - join the mic queue
  - participate in shows of hands
- *Keep audio and video off if not using the onsite version.*

Remote participants

- Make sure your audio and video are off unless you are chairing or presenting during a session.
- Use of a headset is strongly recommended.

Notetaker

- We need volunteers for notetaking.
- https://notes.ietf.org/notes-ietf-127-nmop

Meeting Logistics

- Unfortunately, **Benoît Claise** is not able to join us in SF
- Our secretary **Lucia Cabanillas Rodriguez** is at the chairs table helping with meeting logistics
- Our secretary **Jéferson Campos Nobre** is taking notes, please contribute to note-taking

Reminder for WG Requests

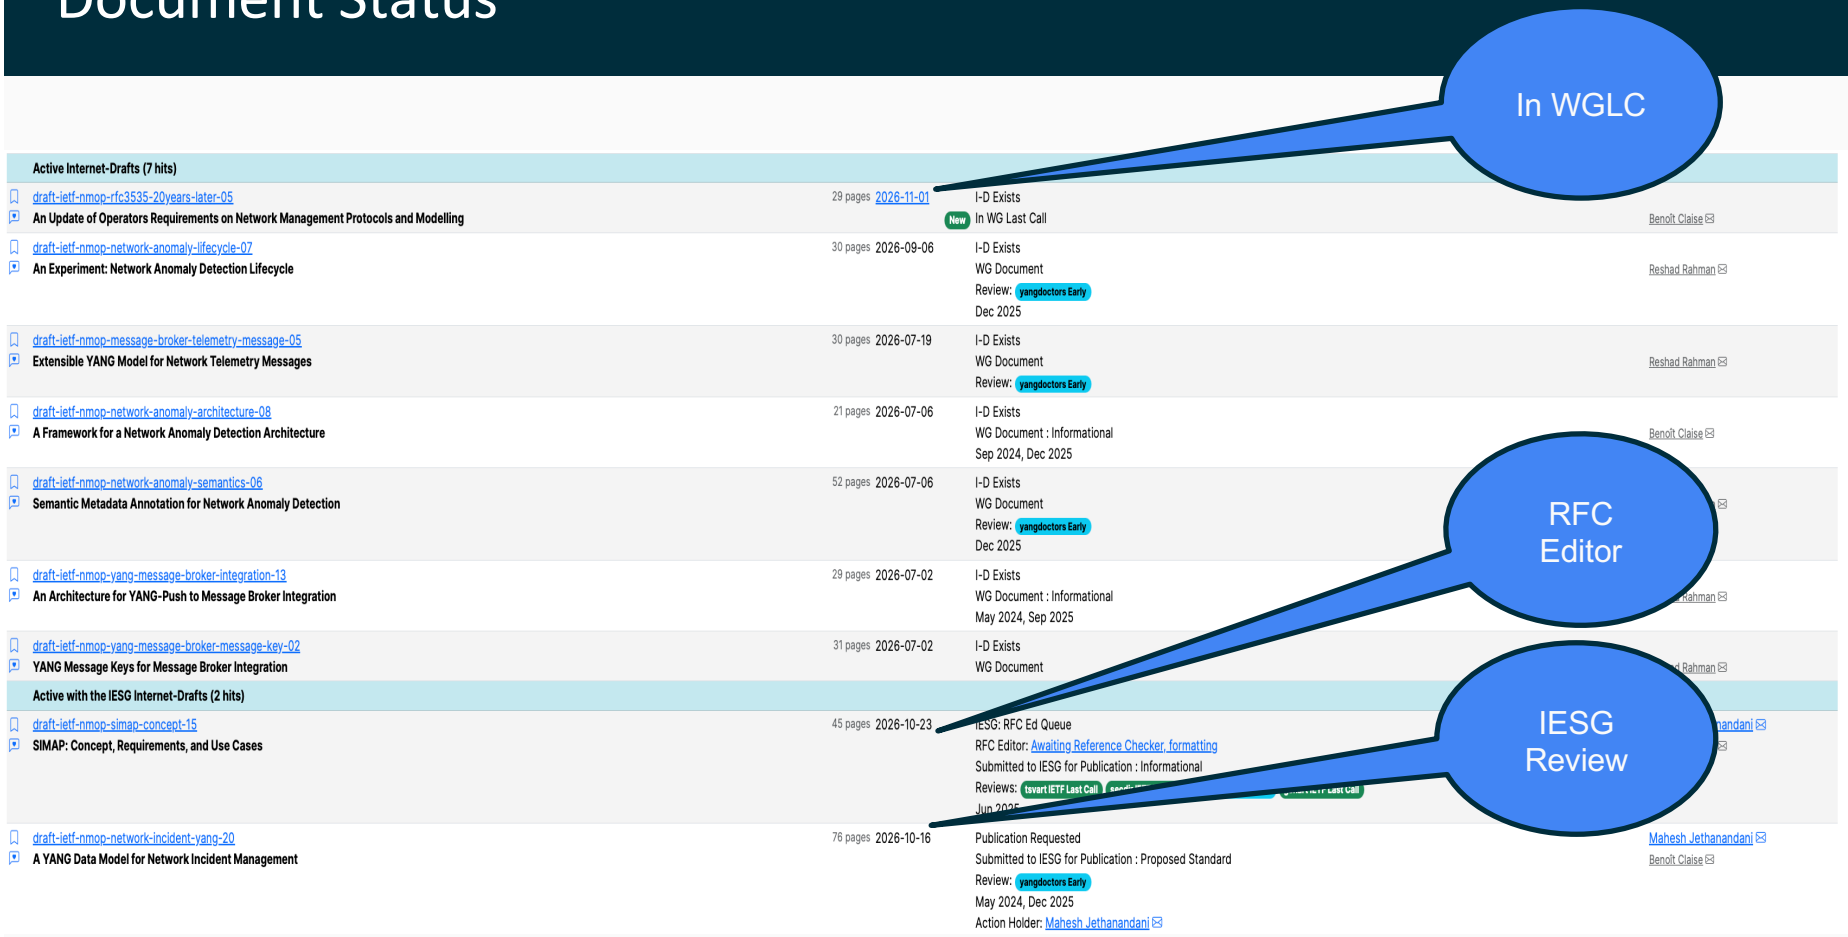

For “new” documents, if they meet 1 or more of the following criteria there is a bigger chance of getting WG time:

- Documents which are related to work already adopted by the WG
- Documents which have had some discussions on the mailing list
- Documents which were submitted early enough (to get reviews/discussions)
- And obviously, documents which fit the charter scope

Agenda: Session 1

Slot	Project	Topic	Presenters
16:30-16:40		Agenda Bashing & Introduction	Chairs
16:40-16:55		Sharing you incident	Joe Clarke
16:55-17:10		NMOP rechartering	Chairs
17:10-17:20	P2	Experiment on Incident Server Implementation Using Agentic AI	Henry Yu
17:20-17:30		AI based Network Management Agent(NMA) & YANG Data Model for NMA A2U Interface	Minxue Wang

Document Status

Active Internet-Drafts (7 hits)			
draft-ietf-nmop-rfc3535-20years-later-05 **An Update of Operators Requirements on Network Management Protocols and Modelling**	29 pages 2026-11-01	I-D Exists New In WG Last Call	Benoît Claise
draft-ietf-nmop-network-anomaly-lifecycle-07 **An Experiment: Network Anomaly Detection Lifecycle**	30 pages 2026-09-06	I-D Exists WG Document Review: yangdoctors Early Dec 2025	Reshad Rahman
draft-ietf-nmop-message-broker-telemetry-message-05 **Extensible YANG Model for Network Telemetry Messages**	30 pages 2026-07-19	I-D Exists WG Document Review: yangdoctors Early	Reshad Rahman
draft-ietf-nmop-network-anomaly-architecture-08 **A Framework for a Network Anomaly Detection Architecture**	21 pages 2026-07-06	I-D Exists WG Document : Informational Sep 2024, Dec 2025	Benoît Claise

draft-ietf-nmop-yang-message-broker-integration-13 **An Architecture for YANG-Push to Message Broker Integration**	29 pages 2026-07-02	I-D Exists WG Document : Informational May 2024, Sep 2025	Rahman
draft-ietf-nmop-yang-message-broker-message-key-02 **YANG Message Keys for Message Broker Integration**	31 pages 2026-07-02	I-D Exists WG Document	Rahman
Active with the IESG Internet-Drafts (2 hits)			
draft-ietf-nmop-simap-concept-15 **SIMAP: Concept, Requirements, and Use Cases**	45 pages 2026-10-23	IESG: RFC Ed Queue RFC Editor: Awaiting Reference Checker, formatting Submitted to IESG for Publication : Informational Reviews: tsvart IETF Last Call Jun 2025	nandani
draft-ietf-nmop-network-incident-yang-20 **A YANG Data Model for Network Incident Management**	76 pages 2026-10-16	Publication Requested Submitted to IESG for Publication : Proposed Standard Review: yangdoctors Early May 2024, Dec 2025 Action Holder: Mahesh Jethanandani	Mahesh Jethanandani Benoît Claise

Milestones

Milestones

Date	Milestone	Associated documents
Sep 2025	Submit Architecture for YANG-Push to Message Broker Integration to the IESG	draft-ietf-nmop-yang-message-broker-integration
Dec 2025	Submit Network Anomaly Management to the IESG	draft-ietf-nmop-network-anomaly-architecture draft-ietf-nmop-network-anomaly-semantics draft-ietf-nmop-network-anomaly-lifecycle

WGLC soon

After msg-broker

Done milestones

Search

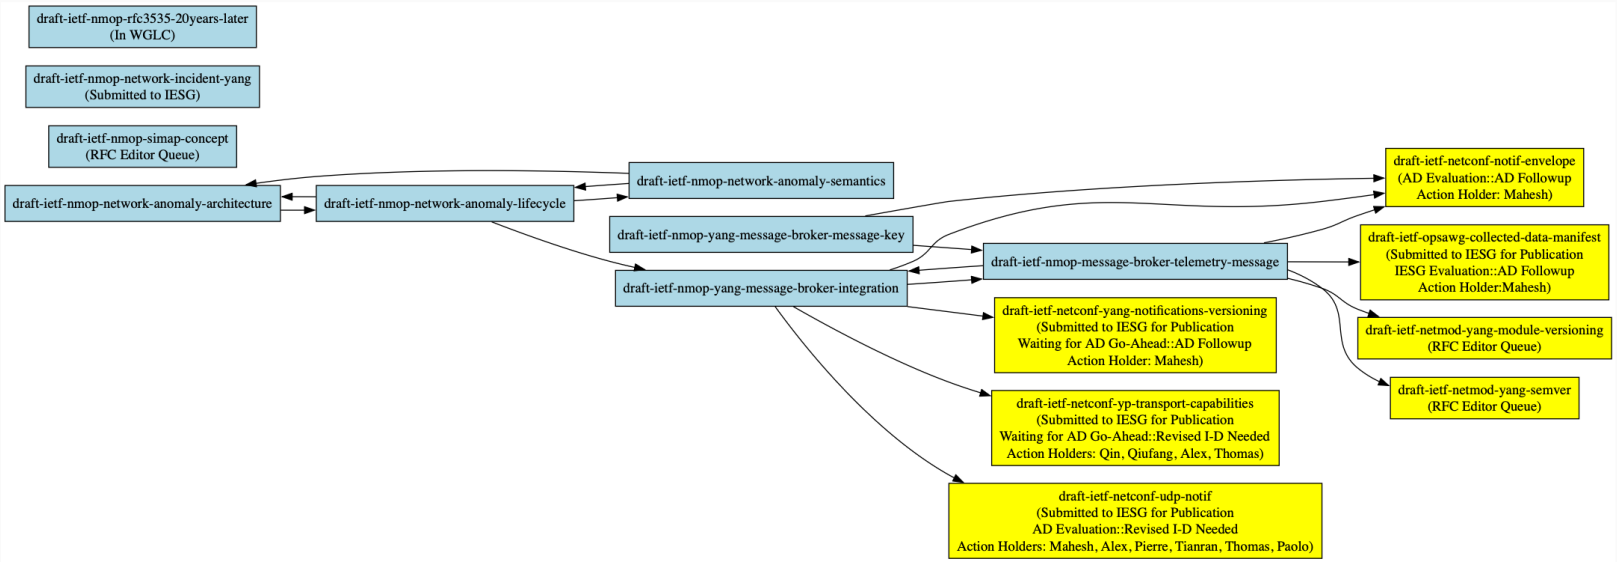

Date	Milestone	Associated documents
Done	Submit NMOP Terminology to the IESG	rfc9940 (was draft-ietf-nmop-terminology)
Done	Submit Network Incident Management to the IESG	draft-ietf-nmop-network-incident-yang
Done	Submit "Digital Map: Concept, Requirements, and Use Cases" to the IESG	draft-ietf-nmop-simap-concept
Done	Adopt a document on network anomaly management	draft-ietf-nmop-network-anomaly-architecture
Done	Adopt a terminology document for anomaly and incident management	rfc9940 (was draft-ietf-nmop-terminology)
Done	Adopt a document on network incident management	draft-ietf-nmop-network-incident-yang
Done	Adopt a document describing how to integrate YANG Push with Apache Kafka	draft-ietf-nmop-yang-message-broker-integration

November 2026

October 2026

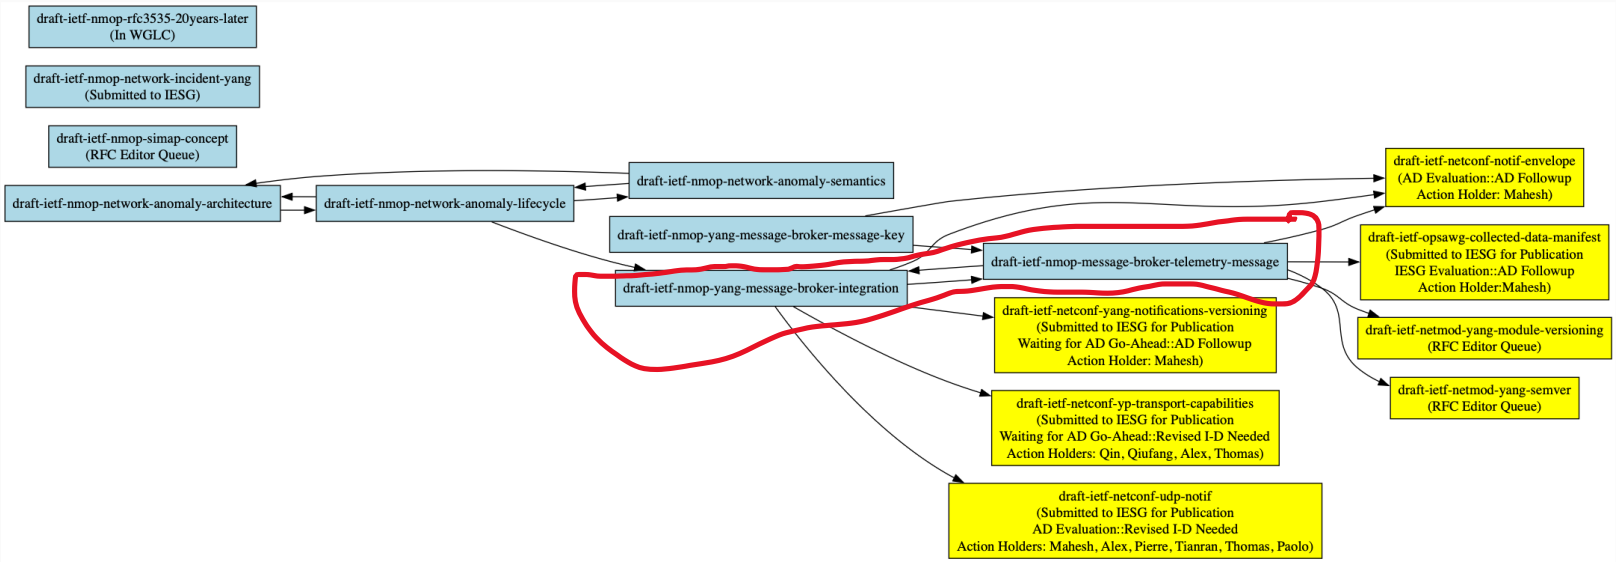

- New milestones needed soon? Let's revisit post-rechartering.

Document Dependencies (normative references)

One down dependency-wise: *draft-ietf-netconf-yang-library-augmented-by* became **RFC 10035**!

Document Dependencies (normative references)

Next 2 documents to progress

Previous responses to ”Request for feedback” (prior to IETF126)

- Request for feedback email was sent on June 8th:
  - Does the current scope align with your operational priorities?
  - Are important topics missing?
  - Issues in the WG?
  - etc
- Responses:
  - Very interested in the “NETCONF/YANG Push integration with Apache Kafka and TSDB” work. Kudos for the focus on running code.
  - More work to do on Binary YANG Push (e.g. SID file management)
  - Suggestion to update charter for “AI for network management automation and related operational issues” e.g. management agent architecture etc

New (since IETF126) responses to ”Request for feedback”

- Like the experiment approach, also:
  - Presentations provide insight with what operators are struggling with
  - Approachable for new audiences
  - YANG-Push/Kafka and anomaly detection work are of interest
  - Support collaboration between NMOP and NMRG, catch attention of researchers
- Additional topics desired:
  - Make all network observability related data (incl BMP and IPFIX) in a standardized fashion with YANG schema and semantics consumable for humans and agents
  - Transforming YANG do DDL (because of current limits of AI agentic context windows)
  - Human in the loop postmortem system implementation. How far should we go there?
  - Explore network management use cases involving AIops
- **Please reply to the email if you have any feedback to share**
