Note Well

By participating in the IETF you agree to follow IETF processes and policies. This Note Well is a reminder of some of those policies. For a linked version of this text, please visit *www.ietf.org/note-well* or use the QR code below.

- IETF participants are expected to behave in a professional manner and extend respect and courtesy to their colleagues at all times (see *RFC 7154: IETF Guidelines for Conduct and IETF Anti-Harassment Policy*). If you have any concerns about behavior, please contact the *Ombudsteam* who have a duty of confidentiality and extensive powers to act, as set out in *RFC 7776: IETF Anti-Harassment Procedures*.
- If you are aware that any IETF contribution (as defined in *RFC 5378: Rights Contributors Provide to the IETF Trust*) is covered by patents or patent applications that are owned or controlled by you, your employer or your sponsor, you must disclose that fact, or not participate in the discussion (see *RFC 8179: Intellectual Property Rights in IETF Technology*).
- For detailed process information consult *RFC 2026: Internet Standards Process* and *RFC 2418: IETF Working Group Guidelines and Procedures* and updates to those.
- The IETF routinely makes public written, audio, video, and photographic records of IETF activities, including your personal information as set out in the *IETF Privacy Statement*.

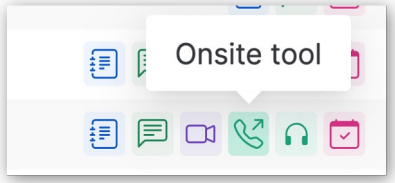

For advice, please talk to Working Group chairs or Area Directors.

IETF 127 Meeting Tips

In-person participants

- Make sure to sign into the session via Datatracker or the QR Code in this session.
- Use Meetecho (usually the “Meetecho lite”) client to:
  - join the mic queue
  - participate in shows of hands
- *Keep audio and video off if not using the onsite version.*

Remote participants

- Make sure your audio and video are off unless you are chairing or presenting during a session.
- Use of a headset is strongly recommended.

Notetaker

- We need a volunteer for notetaking.
- https://notes.ietf.org/notes-ietf-126-nmop

Agenda: Session 2

Compact Agenda: Session 2

Slot	Project	Topic	Presenters
16:30-16:45		Agenda Bashing & Introduction	Chairs
16:45-17:00	P1	Hackathon: Validate YANG-Push to Message Broker End-To-End Data Processing Chain	Thomas Graf
17:00-17:10	P3	BMP YANG Model for Network Telemetry Messages	Leonardo Rodoni
17:10-17:20	P3	YANG Data Model for SIMAP Core Topology & Additional Features	Olga Havel
17:20-17:25	P3	Applicability of RFC8795 YANG data model to SIMAP	Italo Busi
17:25-17:35		Model for distributed policy sharing	Lucía Cabanillas
17:35-17:45		Evaluation Methodology for Network Anomaly Detection	Mateen Ali Anjum
17:45-17:55		Mapping IETF Device YANG models to vendors YANG models	Ian Farrer
17:55-18:00		Generalized Capability Principles	Nigel Davis
18:00-18:10		NMOP rechartering continued **(if needed)**	Chairs
18:10-18:20		YANG anydata validation **(if time permits)**	Ahmed Elhassany
18:20-18:30		Scoping and Comparability Requirements for Telemetry Ids **(if time permits)**	Saumya Dikshit

SIMAP YANG (options discussed @ IETF126)

We discussed the following options:

1. Option 1: agree on a common approach. The author groups could not agree on a common approach.
2. Option 2: use draft-havel i.e. based on RFC8345 (out of scope to explore how TE model can be used)
3. Option 3: use draft-busi i.e. based on RFC8795
4. **Option 4: Cover "base" use-cases/topologies with Option 2, use-cases or technologies which require TE (e.g. MPLS-TE, Optical) use Option 3. We will end up with some overlap for navigation**

The 2 authors groups to agree on what can be covered by RFC8345

SIMAP YANG (IETF126)

Poll question on whether to go with option 4 (both approaches i.e. option 2 and option 3), rough consensus is to go with option 4:

- Yes: 39
- No: 9
- No opinion: 3
